

## Bar Soap Toilet Soap Laundry Soap Processing Line

Toilet soap and laundry bar soap play an important role in our daily life, a good quality toilet soap and laundry soap can bring much more convenient to our life, that why we develop the soap processing line to make high grad toilet or laundry bar soap. The raw material of our processing line is soap noodle, by adding zeolite and silicic acid to the mixer can adjust the fatty acid contain percentage, our bar soap/ toilet soap/laundry soap processing line can make 40-80% fatty acid content soap.

We have 100-150kg/h capacity, 300-800kg/h capacity and 1000-2000kg/h capacity.

The complete working flowchart is:

**Soap noodle and other ingredient---Mixing---Milling---Vacuum plodding---Printing and cutting**

**From the printing and cutting machine can control the size and shape of final soap**

**From this processing line can make both toilet soap and laundry soap**
